Scouts of Europe. By Maxime Badre, 4D

Maxime, a member of this world renown scout society tells me more what it means to be a Scout of Europe.

THE ERA OF VIRTUAL REALITY

By Nour Fontaine, 5B

Virtual Reality or VR is an interactive and immersive computer simulation of real or fictitious environments. It will revolutionise the world in the future years, because it touches all areas: medicines, companies, people, the army, video games and many others matters.

The possibilities are unlimited!

VR uses a virtual reality headset to immerse users. Companies who create headsets are Oculus vr, Sony, Samsung, Google and Microsoft.

Imagine visiting a paradise island thousands kilometers from your home.

These companies invest in VR because, according to Digi-Capital, VR's revenue will be 30 billions dollars. Companies create accessories to go with the headset like gloves or 3d sound to stand out among themselves. VR headsets come out in the middle of 2016. We look forward to use this new technology!

A mysterious discovery in the world of science.

By Clement Tremblin, 3P

In May 2013, Russian scientists made a fantastic discovery : a woolly mammoth in excellent state of preservation in a Siberian cave.

His meat was so fresh that the scientists were even able to enjoy some of it.

Even more incredible: the body of the animal still contained some blood. The discovery hit the headlines all over the world. South Korean researchers specialised in animal cloning did not need long before they took samples to find cells.

According to the researchers, it could enable to clone this prehistoric animal. During an expedition led by the Russian scientists laid hand on a carcass of a mammoth containing

Scouts of Europe.

By Maxime Badre, 4D

Good morning. Today, I want to tell you about the european scouts in Reunion island.

In Reunion, there are not many scouts, just 21. But it's a very great adventure because we have fun and we share some very good moments in a beautiful landscape .We learn to live in community and to manage by ourself in the nature. We organise some week-ends, some camps and different activities like hiking, competitive games and a little time to pray in the day ...

You are welcome if you want !

blood.

It was a woolly mammoth female that died at the age of 60 approximately 10 to 15.000 years ago.

We hope that the next discovery will be a prehistoric monster in excellent state: A DINOSAUR

The Apfel Strudel.

By Ryan Amiour, 4D

The « apfel strudel » Is a specialty of Germany. This is a cake stuffed with apple and accompanied of cinnamon. It's served hot with fresh cream or ice cream. Its preparation is very long and difficult.

Its confection is done in two stages: The preparation of the dough and the stuffing. The difficult is the choice of the apple because it's necessary that the apples don't have a lot of water.

After working on the apples, are added, the cinnamon, sugar, orange peel or grated nuts. The cooking process lasts between one hour and an hour and a quarter.
